

Answers - Stage 4 - Weird and wonderful digestive systems:

1. The writer finds it interesting or fascinating
2. So what animal do you think has the most?
3. Perhaps unsurprisingly
4. Gnashers, nasties, toothy
5. To make the text easy to read and fun/not too serious.

R: The umbrella slug

V: consumed

S: They have a gizzard attached to their stomach where food is ground down. They swallow stones to help with the grinding in the way that teeth do in our mouths.

V: It can change or be different.

R: Up to three days
